

Lincoln Technical Institute in Union, New Jersey has been granted a six year accreditation of their Heating, Ventilation, Air Conditioning and Refrigeration (HVACR) program.

Lincoln Technical Institute wanted to validate that they were preparing their students for the ever changing challenges in HVACR industry.

To accomplish this, they decided to pursue accreditation of their HVACR program.

Programmatic accreditation is where an independent third party, reviews a program against set educational and industry standards. In the HVACR industry accreditation is conducted by HVAC Excellence.

In seeking accreditation, the staff at Lincoln Technical Institute completed a self study evaluation of their program against set standards in: curriculum, faculty, student facilities, placement services, financial aid and advisory committee involvement, training facilities, equipment & safety.

The self study once completed was sent to HVAC Excellence for their executive team to thoroughly assess for compliance against each standard.

Upon completion of their review, HVAC Excellence selected a group of industry veterans with combined technical, administrative and teaching experience in the HVAC industry to validate the self study through an intense review of the program.

Lincoln Technical Institute Granted Accreditation

Having reviewed the self study and evaluated the program, HVAC Excellence decided to grant a six year accreditation of the Lincoln Technical Institute program.

The final determination for the program included a large number of commendations. This should come as no surprise to those familiar with the program, as quality education begins with quality instructors. "Mr. Luis Vendrell education supervisor of the HVACR program is an asset to the school, the community, the HVACR industry, and the students he serves." Stated Thomas Tebbe, National Programs Director for HVAC Excellence.

The title of Certified Master HVACR Educator (CMHE) is the highest credential that can be conferred upon an HVACR educator. While thousands of test have been administered throughout the United States and Canada, only thirty two instructors have passed all of the exams necessary to have the title bestowed upon them. Lincoln Technical Institute in Union, NJ is fortunate enough not to have one of them on staff, but to have two of them. Mr. Richard Pasnizk and Mr. Glenn MacNamara are both Certified Master HVACR Educators.

The accreditation of the Lincoln Technical Institute HVACR program validates that their programs has the necessary resources to successfully prepare students for jobs in the HVACR industry, they have the needed resources and administrative support to accomplish their goals.

Some of the benefits of HVAC Excellence HVACR programmatic accreditation include: students can have more confidence in the HVACR program, employers have the assurance that the graduates are properly trained, creates goals for self improvement, can assist the students in the acceptability of transfer credits and it involved the faculty in the evaluation process.

The United Association of Apprentices and Journeyman (UA) recognized the benefits of the accreditation and has made a commitment to recruiting HVACR technicians from schools with HVAC Excellence credentials as a top priority. The UA has an articulation with HVAC Excellence that provides graduates advanced placement into the UA apprenticeship programs.

Lincoln Technical Institute in Union, NJ is part of the Lincoln Educational Services Corporation a provider of career-oriented post-secondary education. They operate 45 campuses in 17 states offering degrees and diplomas in five areas of study to nearly 30,000 enrolled students.
