

National HVACR Educators and Trainers Conference

HVACR Online Clinic, How to do it!

**Presented by Chris Compton (CMS)
CEO & Director of HVACReduction.net**

SESSION DESCRIPTION:

This session is a primer for anyone in the HVACR education zone that is interested in going online with their HVACR program.

This presentation is based upon 13 years of experience of building and providing online HVACR education to a host of end users. In 2009 HVACRedu.net provided 6000 semester credit hours of online HVACR education to entry level students, technicians, contractors, wholesale employees, and facility engineers around the globe.

What attendees will gain from Attending:

- Pros and Cons of going on line
- Learning Management System
- Lessons in navigation, synchronous VS Asynchronous
- Structure is a key issue
- Blended / Hybrid (winning combo)
- Translating F2F to Online
- Content development – Modules, Courses, and Assessments
- Online activities – Discussion forums, Games, and Simulations
- Instructional assets – animations, handouts, video, and glossary
- Instructor training - Critical
- Dealing with online students

BIO:

Chris Compton is the CEO and Director of HVACReduction.net

His credentials include: field technician, contractor and HVACR program instructor.

In 1998, he saw a unique opportunity for online education serving the HVACR industry and founded HVACRedu.net. His students are traditional and non-degree seeking students, contractors, and the HVACR industry in general.

Chris is a specialist in online curriculum development, the psychology behind online learning, use of video instruction, creating simulations and teaching trade occupations via the web.
